SOLO Health Plans for Individuals & Families

SOLO Health Plans for individuals and families are comprehensive health plans that cover essential health care services. The plans provide full coverage for preventive exams and screenings and unlimited office visits with predictable office visit copays - all covered without having to first meet the plan's deductible. You choose your deductible level and one of four different prescription drug options to tailor the plan to fit your health care coverage needs.

SOLO HSA Plans for Individuals & Families

SOLO HSA health plans allow you to contribute to a tax-advantaged Health Savings Account (HSA), so you can confidently budget for medical expenses. Choose from one of three deductible levels. Benefits are covered in full, including prescription drugs, after meeting the deductible. Preventive exams and screenings are fully covered without having to first meet the plan's deductible. An HSA is a wise way to help cover your medical costs both now and in the future.
